

Website Project Outline

AndersonGlassWaco.com: Expected Launch Date April 1-2

- Build website powered by WordPress content management system (CMS)
- Social Media integration. Allow for both Facebook and Twitter.
- easy media integration photos/video.
- Allow for easy updates and posting of new content.

2nd Chat: Tentative date Feb 25th-27th

After a database is set up and we feel like we have a bit of a product to show you; we'd like to get together for a second meeting to make sure things are headed in the right direction. At this point we will get any input on site features / content that need to be changed.

3rd & Final Meeting: Tentative date March 21- March 22

We will provide you with a draft of the website which we feel is near finished. We would like you to proof this build for any changes. When you feel the site is complete it goes online.

*Both screen capture and audio will be recorded from our teaching time and placed on your website in a location where only you can view this content should you need a refresher.

*Your website will be hosted on our servers. This website has an active database that needs updates on a regular basis due to the growing number of security threats on the web.

*Your website will be 100% backed up on Amazon servers on a weekly basis. A \$20 monthly storage and service fee is charged to keep your website up to date.

Project Outline

Total Due: \$1,600

\$1,600 due at launch
